

# Workshop: Berlin, Germany

## Creating virtual fieldtrip resources

### Berlin Fieldtrip

Digilego is organizing a virtual field course development workshop in Berlin from **August 29 to Sept. 2**.

The aim is to **develop a series of open educational resources** that each have use and value in their own right but also as a larger-scale resource that can be used as a field session/field day in an entirely online capacity. **Participants will also learn how to create virtual field trips and resources.**

Training will be provided on the development of virtual field trips and will include:

- outdoor video capture
- video processing and basic editing, and
- use of H5P to create open educational resources.

The workshop will focus on urban geographic and environmental themes including urban (re)development and planning, historical, cultural and social geography, tourism and urban ecology but other contributions are encouraged.

The workshop will take place in Germany's capital Berlin which offers a large variety of urban, suburban and peri-urban locations for filming. Specific locations and themes for filming will need to be determined at least three weeks prior to the workshop to secure filming licenses.

We are interested in bringing a diverse group of people together to work on creating open educational resources. We are particularly keen to involve colleagues who would like to contribute expertise specific content.

### Who can attend

All staff within the partner institutes is able to attend. Note however that each institute has a limit on number of participants (3 to 4). Contact your local Digilego lead for more info.

### When

The workshop will start on the **morning of August 29th** and end in the **afternoon of September 2, 2022**.

### Where

The workshop will take place in Berlin at a range of locations within the city. Accommodation specifics are to be confirmed soon.

### Cost

Attendance of the workshop is free of charge. Funds for travel and accommodation (5 days) are available from the Digilego project.

### Registration

Contact Julia Affolderbach (affolderbach@uni-trier.de) or your institution's digilego lead to express participation interest by **June 30**.

We ask that you provide a short statement on your **motivation** to attend and encourage you to propose leading a specific input activity for open educational resource development during the workshop.
